

## RISK ENGINEERING CONSULTANT

**Date:** May 2019

**Office:** Madrid

**Job Function:** Risk Engineering Consultant

**Employment Type:** Full Time - Permanent

### **Job Description**

RSA Risk Consulting is central to supporting the success of RSA's Global Risk Solutions (GRS) business, which provides insurance and risk management solutions to large corporate customers across Spain. At the heart of our offering is a dedicated team of risk engineering consultants who work in partnership with customers across a wide range of commercial and industrial facilities to identify, quantify and reduce risk.

In line with our ambition to continually improve our risk management offering and achieve 'Best in Class' status, we are looking to strengthen the team with the appointment of a new risk consultant. This is an exciting opportunity for a highly-motivated individual looking to develop their existing skills and experience in loss prevention.

To support the retention and winning of new business, this role involves managing and delivering efficient and effective risk management and loss prevention services across all sectors of the general property business.

As a member of our in-house team the successful candidate will work closely with underwriters, risk management partners and Risk Consulting colleagues to help shape and deliver the Risk Consulting proposition.

The role typically involves undertaking risk surveys at customers' sites, including writing up reports, and providing other risk management support to GRS underwriters and customers.

This role would suit an individual with good analytical, relationship management and communication skills, as well as strong capability in one or more of our core technical disciplines of property loss prevention, business continuity, liability, machinery breakdown and crime. A relevant Engineering degree is required.

This is an office based role and travel will be required within in the Spain with occasional wider international travel. This is mainly to provide support to our underwriting team based in our Madrid office.

### **Desired Skills and Expertise**

#### **Responsibilities**

- Undertaking detailed risk assessments at customer locations and conducting account/ prospect reviews to help secure profitable business within the agreed risk appetite and to minimise future claims.
- Providing close technical risk management support to underwriters with risk selection and the maintenance of technical underwriting practices.

- Supporting underwriters and other internal stakeholders in promoting the RSA risk management proposition to customers and brokers. This includes being able to articulate at senior level, in areas of the proposition outside of the consultant's own areas of expertise.
- Contributing to the development of RSA risk management propositions by bringing knowledge and insight of customers and risks and applying this within GRS business objectives.
- Managing customer interactions in an efficient, courteous and timely manner in order to deliver high standards of customer satisfaction.
- Providing advice, guidance and coaching to technical colleagues to develop knowledge and understanding of customers and their businesses, as well as associated commercial drivers and risks.

#### The individual

- Previous experience of working as an insurance risk engineering consultant  
Or
- Previous experience of managing engineering risks in industry.
- (Suitable training and mentoring will be provided for successful candidates).
- Evidence of technical training and risk control knowledge. This can include recognised professional qualifications and in-house training programmes.
- Good analytical, technical, relationship management and communication skills
- Strong capability in one or more of our core technical disciplines of property loss prevention, business continuity, liability, machinery breakdown and crime.
